NATURALLY LIVELY

3

We have revised our collection folder for you:

- more choice: numerous new pictures in addition to proven motifs
- quickly to the desired image: Alternatives to many motives
- easier orientation: fewer categories, clear naming
- simplified and optimised: Explanations regarding the collection and the order process
- to the point: special motif features clearly marked on the motif and in the index
- helpful and stimulating: Inspiration themes with ideas for interior design
- alive and practical: Room visualisations as concrete application examples

Have fun browsing!

STATE OF THE ART: OUR IMAGEQUALITIES

We offer **aerial and panoramic shots of exceptional locations and from unusual perspectives**. The images are taken with the help of drones, helicopters, inflatable boats, etc. The latest photography technologies are used – even under the most adverse climatic conditions and with high risks for the photographers'.

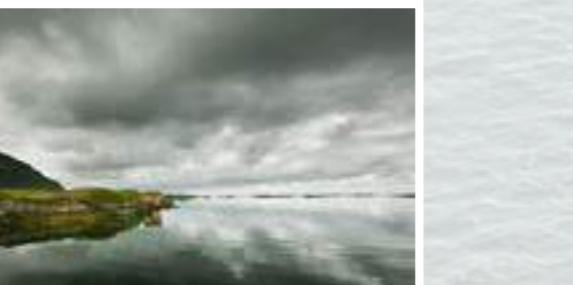

Thanks to the **latest reproduction and image processing technologies**, you benefit from a crisp resolution. As a result, the images allow for a very high degree of scaling. The advantages: They look extremely realistic – both in terms of texture and colour reproduction.

Impress yourself with **graphic designs in unusual colours and shapes**, many of them with metallic effects. Opulence and generous graphic gestures make the room appear larger, details give an idea of something bigger. Expressive, soft and light, wild and untamed, clear and geometric – the designs are always special and unique.

Exclusive landscape motifs, city and street shots, car backgrounds and HDR spheres that will convince you with their outstanding **aesthetic quality of image composition and colouring**. The motifs always leave enough space in the lower area to interact with objects and furniture.

HIGH RESOLUTION! LARGE SURFACE!

Now that is crisp! Thanks to the highest resolution, the HD motifs can be mounted on the wall in almost any size. A further benefit: Thanks to the extremely high resolution, they look amazingly real – like a 3D effect. More vitality for your walls is not possible!

RAZOR-SHARP HD MOTIFS

NEVER ALONE AGAIN

Weddings, birthdays, holidays and parties – all the wonderful occasions you have celebrated with family and friends provide great motifs for individual collages. And the best bit: You'll never be home alone again. Holiday memories and family get-togethers come alive on your walls. Just tell your stories on the wall. Also as a gift or souvenir it's a great idea!

Teambuilding for viewing

Design the office or canteen with the most beautiful impressions of the last anniversary, a successful company celebration or outing. After all, what could be more beautiful to strengthen the team spirit? Or provide workspaces with a collage of beautiful pictures for that extra sparkle. Also ideal for staging only parts of a wall. The possibilities are as varied as the motif combinations.

I look into your eyes ...

We bring your face, or that of your favourite person onto a stylish background. In this way, a portrait becomes a special one-of-a-kind piece of work – a homage that comes alive on your wall day after day. Portrait painting has a long tradition, which we give a new dimension to with this kind of portrait.

The way to the desired collage

You can create your individual collage from your own designs with our configurator. You determine the arrangement of your images, no matter whether they are ordered or chaotic. You can also prepare your desired collage with professional software and then upload it. Do you need support? Then contact us: digitaldruck@erfurt.com | Tel: +49 202 6110.370

THE WALL AS A BRAND AMBASSADOR

In particular, unused wall and ceiling surfaces in heavily frequented areas are particularly suitable for putting a company brand on the wall and bringing the corporate philosophy to life. With photo wallpaper, this is very simple – in just three steps: Set wall dimensions and motif, upload graphics, have them wallpapered – done!

CORPORATE BRAND ENACTED ON A LARGE SCALE

The smarter customers, colleagues and passers-by are confronted with a brand and its brand message, the more professional the public image is. With photo wallpaper, both can be easily presented on a large surface. Even anniversaries, the company history or special events can be effectively and effortlessly highlighted.

UNBOUNDED

BRING THE SKY INTO YOUR HOUSE!

Why leave your ceilings unused?

They are ideal surfaces for large-format paintings, landscapes and unobstructed views upwards. No furniture, windows or doors obscure the view or make wallpapering more difficult. All right, let's go: Turn your ceiling into an experience – like in a historic palazzo ...

Play with the dimensions!

With the individual ceiling design you achieve a completely new spatial effect that emphasizes the room, or breaks its boundaries, making it appear higher or lower. In this way, motifs can be extended from the wall to the ceiling – or use the free surfaces as information carriers, for example for signage systems. A ceiling lamp can also be wonderfully integrated into many motifs. The possibilities are unlimited.

PRINT INSTEAD OF PAINT!

Precise colour gradients, complex shapes, transparency – a great challenge when working with brush and roller. A piece of cake with photo wallpapers: No defects, no paint splashes, no masking, no drying times. In no time at all, the perfect result is on the wall!

No surprises on the construction site!
There are no nasty surprises because exact colour matching after proofing and sampling is no problem. You benefit from a wider range of colour nuances when you print instead of painting. Your great advantage, for example in the field of shopfitting: Overnight you give the room a completely new effect – without having to take drying times into account!

Precise colour gradients – simple printing. You can't paint them that perfectly. Whether hue to hue or light to dark, whether vertical, horizontal or completely different. A wide range of colours makes it possible to create any desired colour gradient – in unprecedented perfection.

The way to the desired colour gradient

Once you have chosen one of the four gradient types, you can choose the appropriate colour. We print monochrome surfaces and monochrome to multicolour gradients on 50 cm wide ERFURT nonwoven. Material, feel and embossing are the same as with our basic material. Here we use another special printing process. Important note: The order is not placed via the configurator. Please use the enclosed order form or contact us: digitaldruck@erfurt.com | Tel: +49 202 6110 370

Landscapes

Our most popular motives

The absolute top sellers among photo wallpapers: There are landscapes and perspectives that are simply always attractive and touch the soul. The vastness of the horizon, the infinity of the sea, the silence of the forest – such longing motifs provide relaxation after stressful days and inspire the viewer to give space to the really important things.

Surfaces and textures

Razor sharp

Some like it in concrete terms: Photo wallpaper can also show photo-realistic details in amazing quality! Rooms gain depth and individuality through diversified textures. Interior design uses rustic accents or interesting visual effects. Surfaces of all kinds in razor-sharp quality lend every wall a whole new dimension.

Plants

A home in the countryside

You don't need green fingers for these plants: Everything that the flora has to offer, we bring to your walls – beautiful flowers, magnificent shrubs, blooming meadows. That means „at home“ is also „out into the wilds“ at the same time. So the day always ends in a sea of blossoms or a romantic clearing.

Art and graphic design

Modern visual language

Geometric, flowing, strict or colourful: For many rooms and furnishings there is an original motif in the category „Art and graphic design“. Entire rooms, individual walls, or wall sections shape the impression of a room and give it a specific character – sometimes calm and orderly, sometimes unconventional and inspiring. For everyone who loves abstract or classic graphic design ...
